

*Complete, efficient
storage &
dispensing systems
through innovation.*

PharmashelveTM 
Plus

PharmashelveTM
Plus

Adaptable Medical Storage Solutions.

The Pharmashelve Plus storage solution has been developed specifically for pharmacies and hospital dispensaries.

Designed to maximise your available space and increase efficiency. Whether you need to increase your current stock holding capacity in the existing space, or to decrease the current space in order to utilise your working area better.

Our storage systems are entirely focused on medicine storage, retrieval and dispensing efficiencies.

We are able to customise and scale our system to suit your individual needs and create your perfect storage environment. Purpose designed for a pharmacy or hospital, Inov8's aim is to help you optimise your work flow and processes.

With our 1000mm and 500mm width bays you can achieve increased storage capacity over any existing systems. Add to this Inov8's completely integrated modular clinic furniture which expands your choices, options and flexibility even further.

Pharmashelve plus drawer system

This full extension pull out drawer can be fitted either angled or flat.

When angled, the drawer provides a self feeding system allowing you to fill from the rear with ease, rotate your stock and maintain the 'first in first out' principle. Our drawer system ensures each stock item has greater visibility and therefore reduces picking errors.

When fitted flat, the drawer easily holds bulky items at the optimal user height.

The deep drawer system is designed to fit those larger items which need to be stored and protected from dust, either under the worktop or on a full height bay.

Bays shown here without optional plinth kickers and base plinth drawers.
 Available as double-sided or single-sided. (Double sided shown).

Pharmashelve Gyro round shelf unit is a perfect solution for the safe dispensing of fast moving medicines within the pharmacy, where space is restricted.

This unit, with 9 rotating shelves, has a high density of stock holding capacity in a small space; equivalent to 25-30 metres of linear storage in a tiny foot print of 1100mm diameter.

The independent revolving shelves allow for multiple selections at the same time and the Gyro is ideal for fast moving items in a busy Pharmacy delivering effective and cost efficient dispensing.

Dimensions:

Height 2200mm

Diameter 1100mm

Depth between shelves 180mm

Shelf depth 500mm

High impact clear front risers.

Clear plastic divisions allow for greater stock separation.

Made from painted mild steel.

Nickel coated bearings.

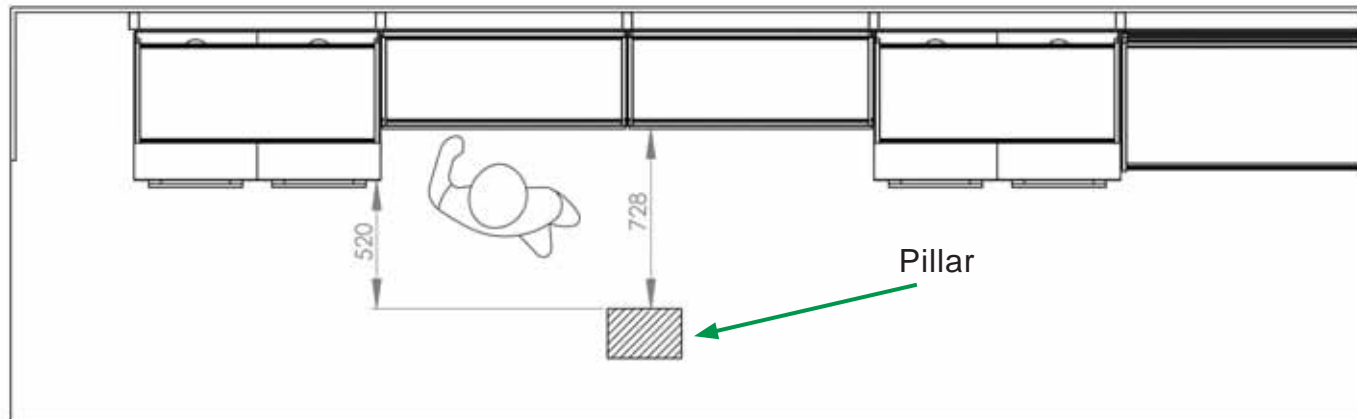

Dust cover top

PP-GYRO-1100

Different Size Options

Having different size options means the room can be worked around to make useable accessible space; pillars, alcoves and boxing on walls can all be designed around to achieve a workable solution.

As shown (left) the different depth units demonstrate how a pillar in the room can be worked around.

Storage Capacity

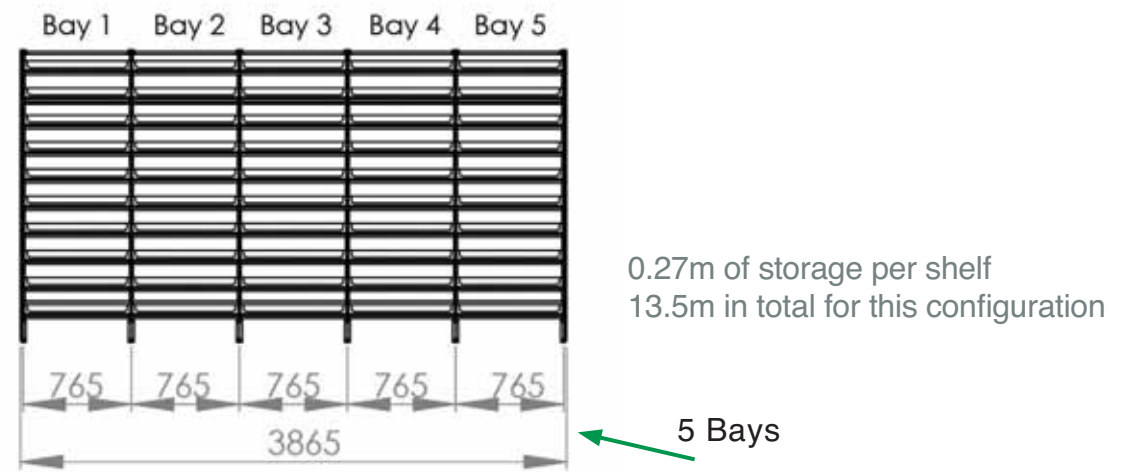

Why choose a 1000mm bay width

Working with 1000mm bay widths gives you more storage compared to 765mm bay widths (see comparison on right).

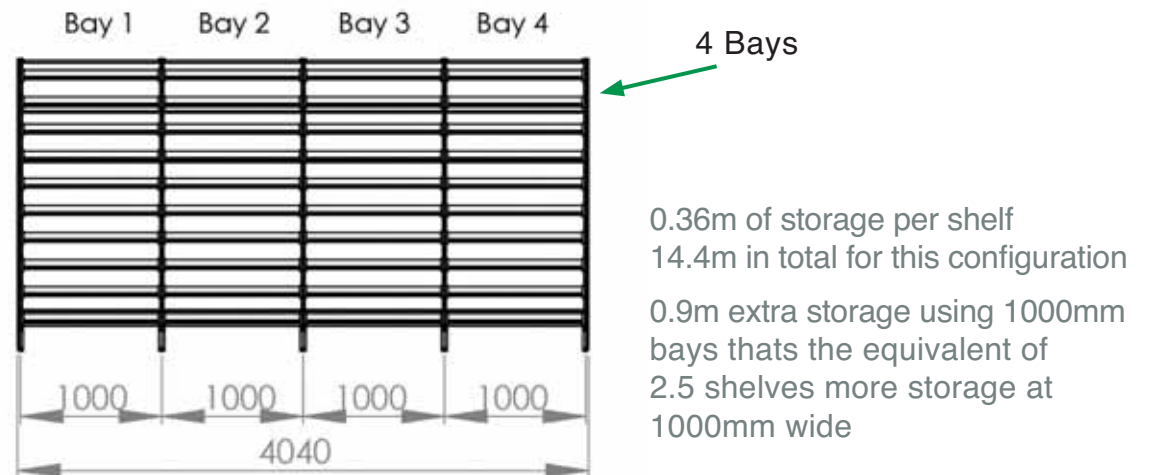

Whilst less shelves are utilised greater storage is achieved, gaining savings on the cost of bays as well as installation.

Pharmashelve™
Plus

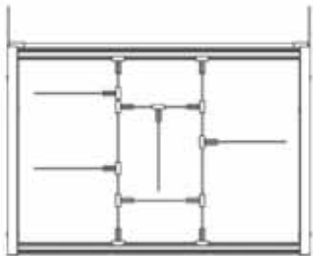

More storage created with only 4 bays instead of the previous 5 bays

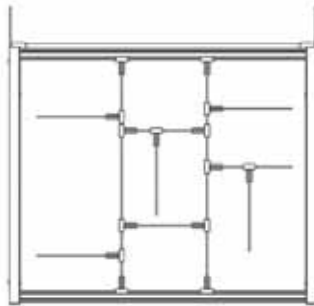

Clear Divider Layouts

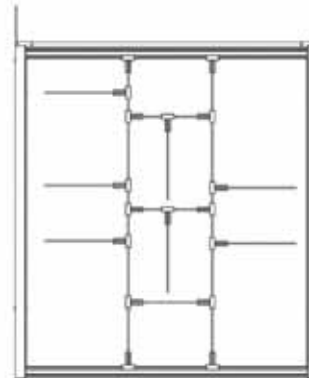

Clear dividers are available to create various configurations and storage solutions, within the different sized drawers
